

Way of Life!

BALENO

Suzuki's "Way of Life" is the heart of our brand - every Suzuki vehicle, motorcycle and outboard motor is built to create excitement so customers can enjoy everyday life.

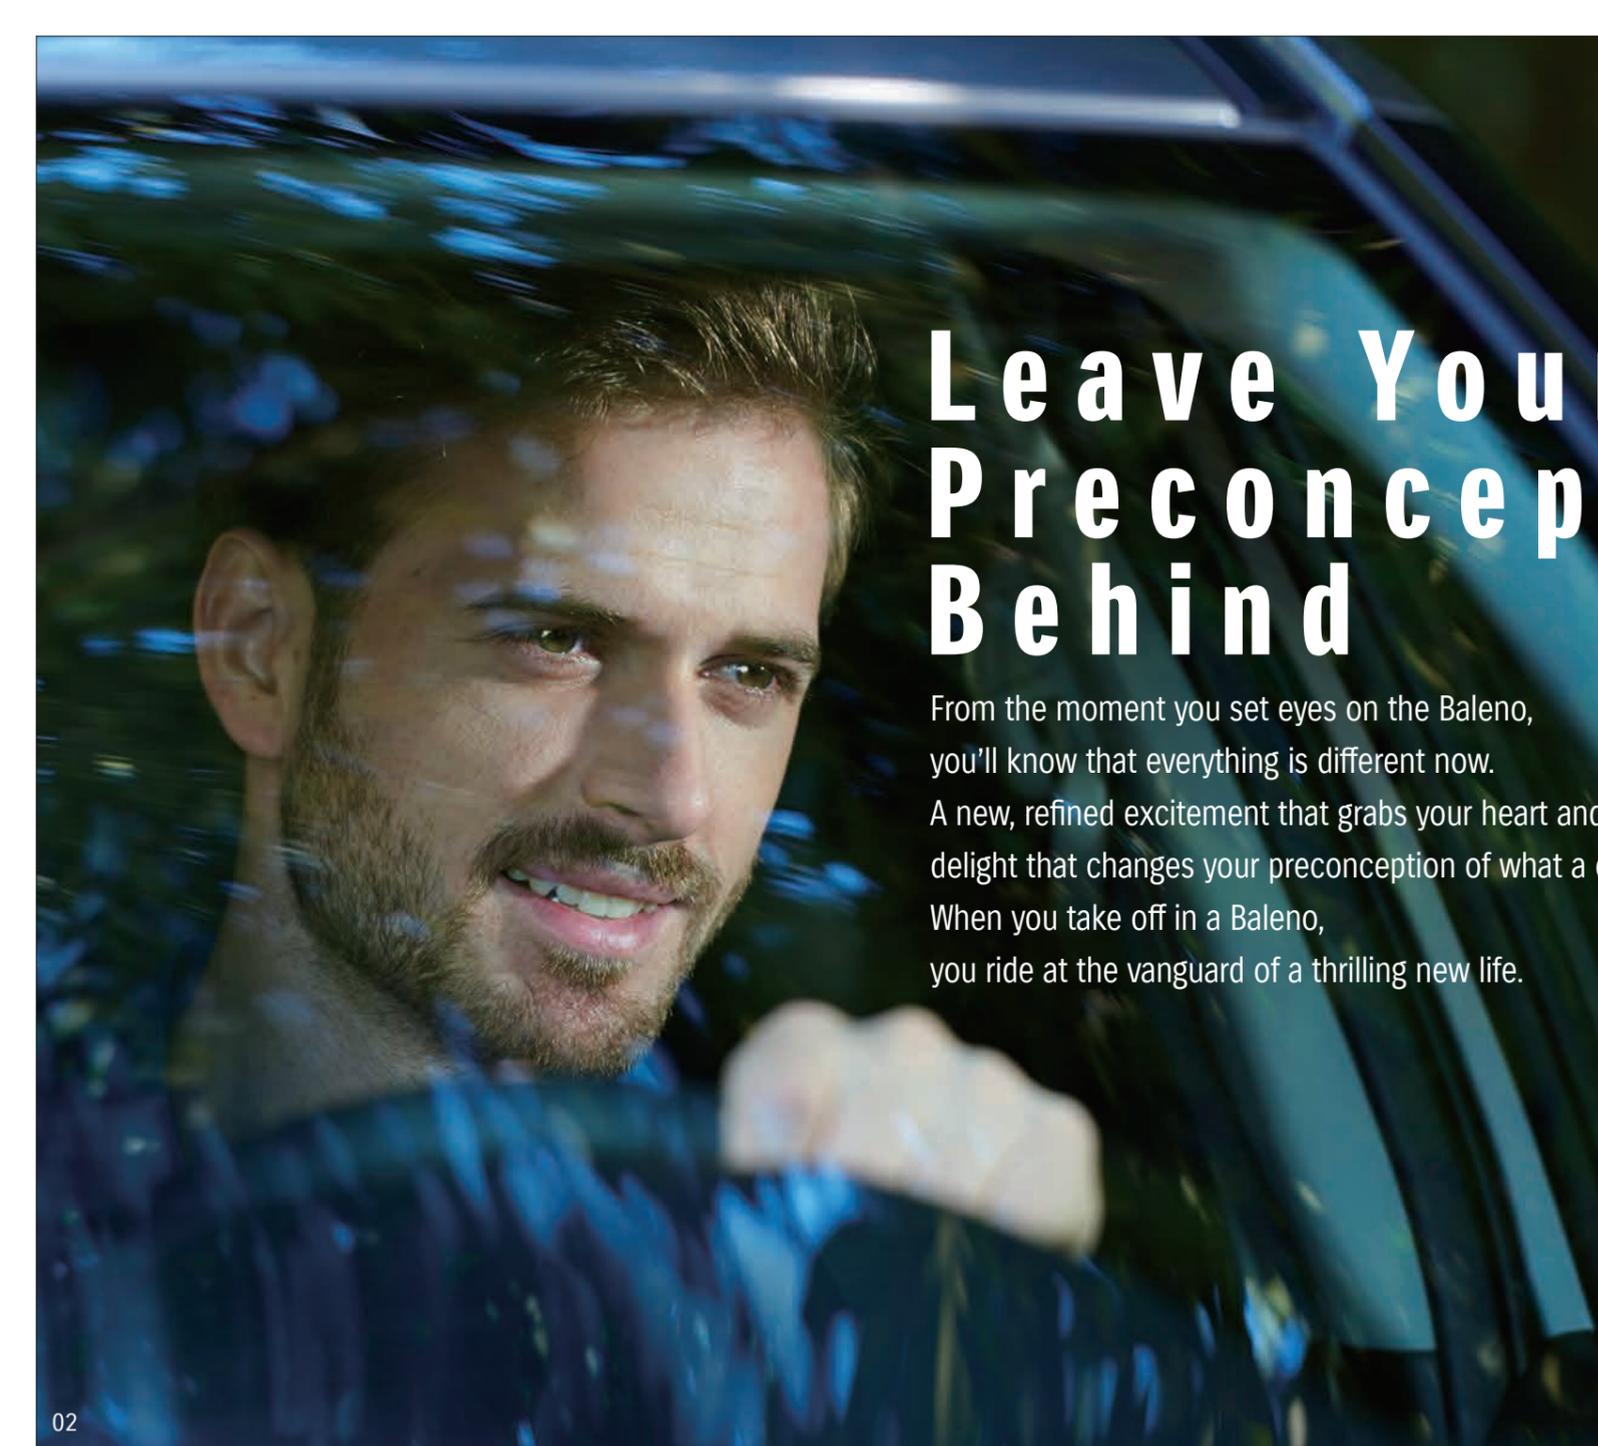

Standard and optional equipment available may vary for individual markets. Please enquire at your dealers, as specifications and illustrations may refer to models not available in your region. SUZUKI MOTOR CORPORATION reserves the right to change, without notice, prices, colours, materials, equipment, specifications and models, and also to discontinue models.

All photographs in this catalogue were taken with relevant permission. Images of the vehicles without number plates on public roads are composite photos. Vehicles are shown at a private off-road site.

BALENO BROCHURE (G)
99999-B1801-001

Leave Your Preconceptions Behind

From the moment you set eyes on the Baleno, you'll know that everything is different now.

A new, refined excitement that grabs your heart and won't let go - a sense of delight that changes your preconception of what a car can be.

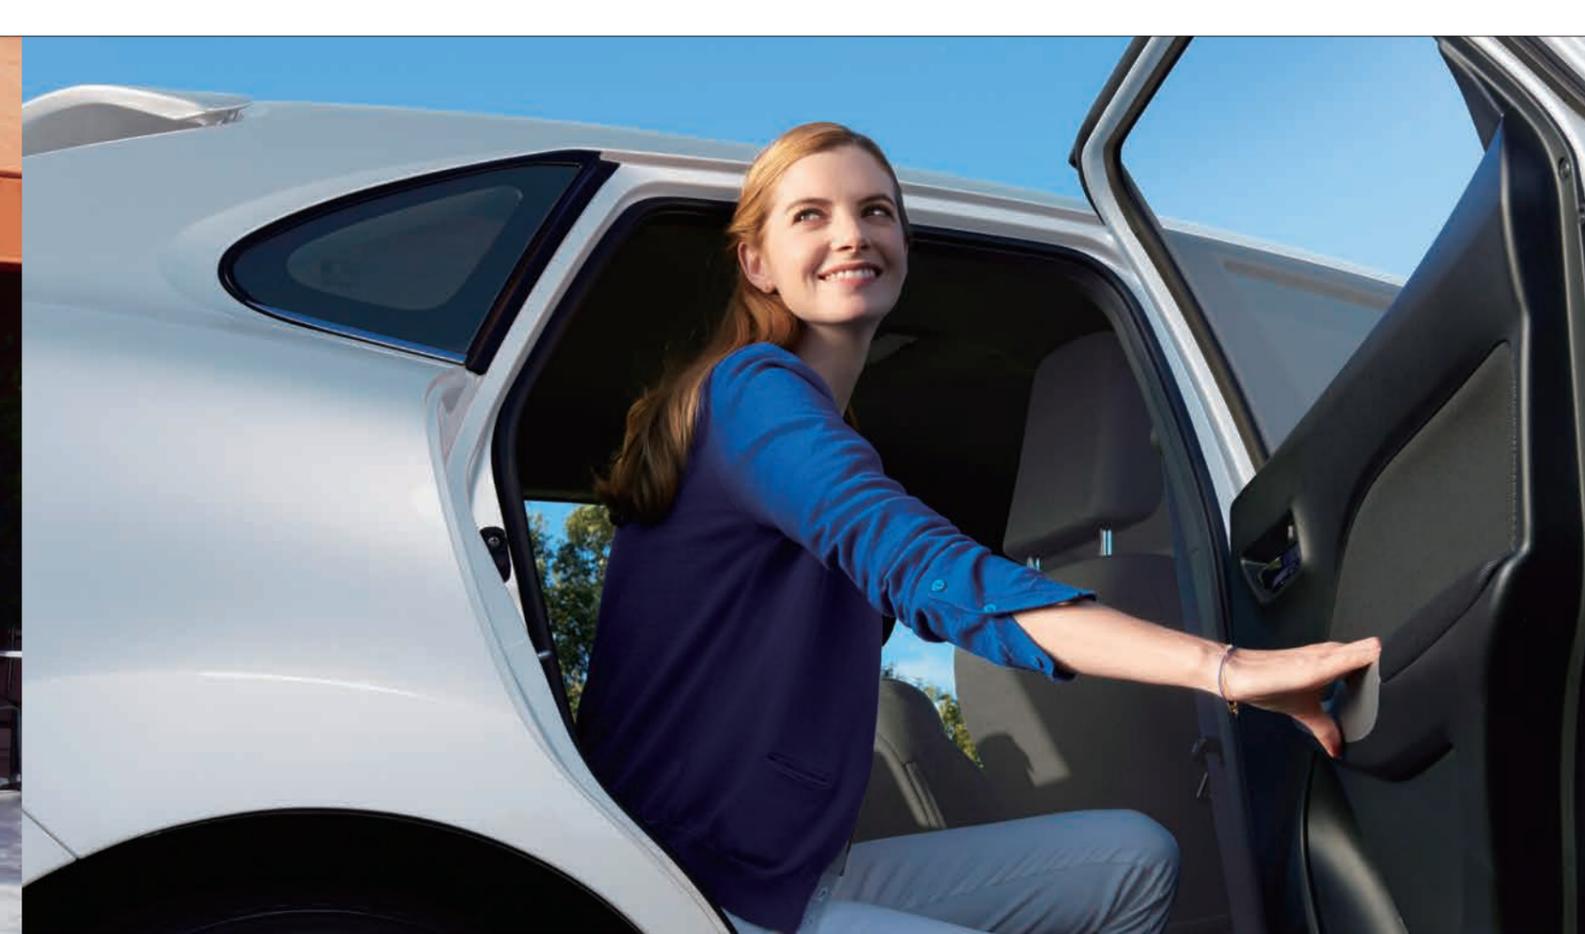

When you take off in a Baleno, you ride at the vanguard of a thrilling new life.

Is the Design Discerning?

We wanted to incorporate new design into the style of the vehicle without losing its individuality. The Baleno combines a low and wide form for outstanding stability with a body shaped by dynamically flowing curves. This painstaking attention to design is what grabs the viewer's heart and refuses to let it go.

Does It Compromise on Spaciousness?

Our focus on style didn't lead us to neglect the pursuit of spaciousness. The Baleno offers best-in-class cabin space*, with plenty of room for adults to ride in comfort while also securing generous storage capacity for luggage. This sense of comfort and openness is what makes going out fun.

*Suzuki's definition of "B-segment hatchback": a hatchback model that has an overall length of 3,700-4,100mm. Suzuki's internal research as of November 2015. 07

Is It Exhilarating to Drive?

The Baleno offers outstanding performance and makes driving fun by merging the merits of a light and rigid new-generation platform and a strong and highly efficient powertrain. Once you take off, you'll want to keep on going.

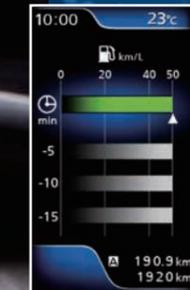

A Stylish User-friendly Instrument Panel

The Baleno instrument panel follows the low and wide design concept of the exterior, creating an expansive interior space. The innovative design of the instrument panel centre, with easily operated audio and automatic air conditioning controls, accentuates the cockpit.

Advanced Multi-information Display

When you slip into the driver's seat, the first thing you notice is the information display at the centre of the instrument cluster, which gives a clear picture of the state of the car. This advanced multi-information display has a 4.2-inch colour LCD screen (GLX) that intuitively conveys a range of information such as fuel efficiency, engine output, average vehicle speed and driving results.

Displays traveling fuel efficiency and average past fuel efficiency.

Displays power and torque in real time.

Displays average vehicle speed and average past vehicle speed.

Indicates proximity to objects when rear parking sensor is in operation.

Displays driving time, driving distance from engine-on to engine-off and distance to refueling.

A Cockpit that Stimulates

Audio System

The high-contrast LCD panel ensures excellent legibility of the display. The system plays radio (AM/FM), CDs as well as USBs. The audio system features six speakers as standard, with wireless connectivity via Bluetooth®* (GLX and GL) for smartphones, tablets, and other mobile devices.

* Bluetooth is a registered trademark of Bluetooth SIG, Inc.

Automatic air conditioner

Manual air conditioner

Air Conditioner

The automatic air conditioner (GLX) has a unique circular display, with a high-contrast LCD panel. GL and GA grades come with a manual air conditioner.

Cruise Control

A cruise control system (GLX) boosts convenience, especially when cruising on highways, by keeping the car moving at a constant, driver-set speed without requiring the driver to keep pressing the accelerator pedal.

A Comfortable Cabin and Easy-to-use Storage Space for Enjoyable Long Drives

You would never imagine how spacious the interior is given body length of 3,995mm. The rear seats offer plenty of space for legs and shoulders so even adults can ride very comfortably. The addition of compartments here and there for stowing small items and drinks make the spacious interior even easier to use.

Comfortable and Spacious

355L Best-in-Class* Luggage Space Makes Going Out Fun

One of the Baleno's charms is a practical, best-in-class luggage space that meets the needs of a range of uses from everyday shopping to family trips. It allows the sideways stowage of long items, such as a golf bag or pushchair. As an added amenity, a luggage-area cover (GLX and GL) ensures privacy.

*Suzuki's definition of "B-segment hatchback": a hatchback model that has an overall length of 3,700-4,100mm. Suzuki's internal research as of November 2015. Luggage space measured using the German Association of the Automotive Industry (VDA) method.

1.4L Engine

Beneath the flowing lines of the bonnet is 1.4L engine designed in the pursuit of maximum energy efficiency. The 1.4L engine delivers excellent driving performance for both tremendous power and fuel efficiency. The intake VT, cylinder head, and piston crowns are designed to boost fuel economy, which is enhanced by a great aerodynamic body.

High Levels of Performance and Fuel Efficiency

5-speed manual transmission

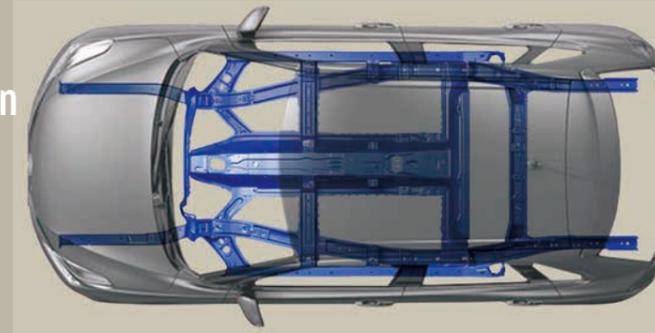

4-speed automatic transmission

Transmission

A 5-speed manual transmission provides smooth and precise shift feel while its optimal gear ratios benefit fuel economy. A 4-speed automatic transmission is also available for GLX and GL grades.

A New-Generation Platform that Pursues an Ideal Form

Developing the Baleno led to huge leaps in the evolution of its platform. The ideal form of a framework with smooth and continuous curves disperses energy and heightens rigidity while also achieving light weight by eliminating the unnecessary. This new-generation platform elevates fundamental automotive functions like cruising, turning, and stopping to the next level.

Simple Shape Resistant to Deformation

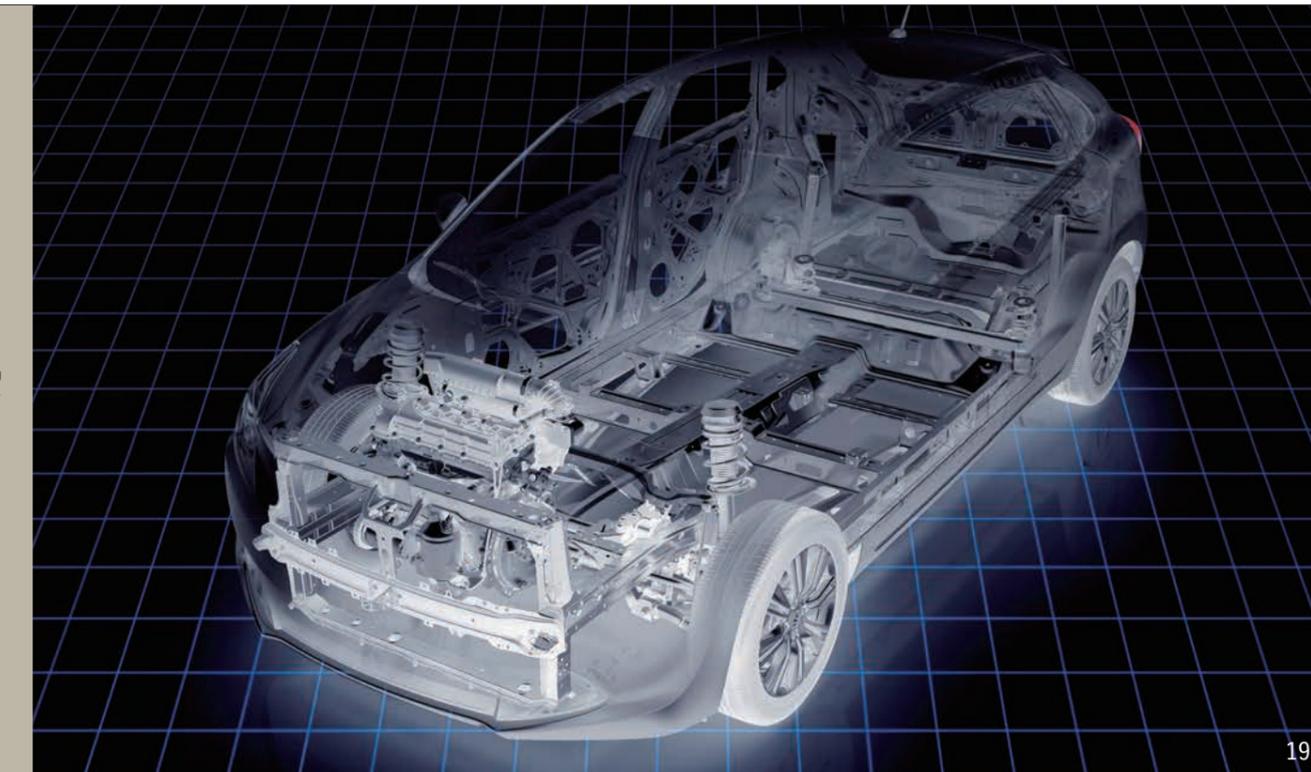

The frame with smooth, curving lines with fewer joint points enables reduction of the reinforcements that were required on the joint points in previous frames, resulting not only in lighter weight, but dispersing collision energy more efficiently.

New Heights in Cruising, Turning, and Stopping

Suspension that Contributes to Stable Handling

The highly tuned suspension enables maintenance of an optimal line when cornering and a stick-to-the-road sense of stability on straightaways. Enjoy direct-response and exhilarating handling.

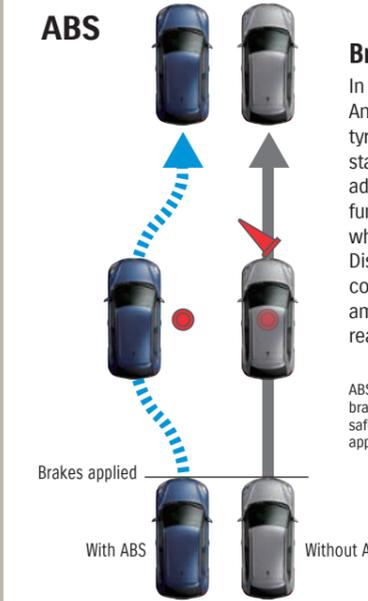

Essential Safety Features for Greater Peace of Mind

Knowing you're well protected can make driving more fun. For greater peace of mind, the Baleno is equipped with preventive and collision safety features designed to mitigate injury in the unlikely event of an accident. These features include an Anti-lock Brake System, a energy-absorbing body, and multiple airbags, as well as protection for pedestrians.

ABS

Braking Assistance:
In an emergency braking, an Anti-lock Brake System (ABS) keeps tyres from locking up and adds stability to evasive maneuvers. In addition, a braking assistance function augments stopping power, while Electronic Brake force Distribution (EBD) helps maintain control by sending the optimum amount of force to the front and rear wheels.

ABS is a device that assists the driver during braking. It does not eliminate the need to drive safely, for example by slowing down when approaching a corner.

Pedestrian Protection:

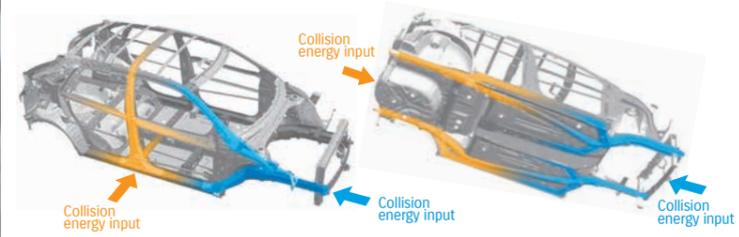

To mitigate the extent of injuries in the event that the car comes into contact with a pedestrian, the Baleno's bonnet panel, cowl top, wipers, and bumpers are built to absorb impacts.

Greater Safety Ensures More Enjoyable Driving

Light, Energy-Absorbing TECT Body and Airbag System for Protecting Occupants

The cabin is protected in the event of a collision by a body structure that efficiently absorbs and disperses energies from the front, side, and rear. Another layer of protection is provided by SRS airbags for the driver and front passenger. Safety is further enhanced by SRS side airbags and SRS curtain airbags on the GLX grade.

*The airbags are shown inflated for informational purposes only

Pioneering Delight
