Way of Life!

# Beyond your imagination

Think of a stallion, nostrils flaring and raring to go.

Then savour the beauty of the bold new Suzuki Grand Vitara.

Suddenly you feel compelled to rediscover yourself.

Jump in and hit the highway! Set out on a quest for the freedom and fun you didn't realise you were missing.

Take the road to places beyond your imagination.

A new ride, a new destiny, a rediscovery!

# Go with confidence

With its powerful engines and transmissions, the Grand Vitara enables you to call the shots. Whether gliding over smooth surfaces or roughing it out on rugged terrain, you will feel the excitement of being behind the wheel. Confident in your vehicle, you are ready to go where your desires take you.

Suit performance to your sensibilities, with four engines and manual or automatic transmissions to choose from. Engine selection comprises 1.6- and 2.4-litre petrol with variable valve timing (VVT) technology, a 2.0-litre petrol and a 1.9-litre DDiS (Direct Diesel injection by Suzuki). VVT and DDiS increase power and torque as well as fuel efficiency. Both technologies widen the performance range while reducing fuel consumption, maximising cost performance. An additional benefit of the DDiS common-rail fuel injection system is reduced harmful emissions. The variable intake system is also available in the 2.0- and 2.4-litre engines. This system varies the length of intake port in response to the engine speed, which realises greater torque in broader ranges of the engine speed.

**1.6-litre VVT petrol engine**

**2.0-litre petrol engine**

**1.9-litre DDiS diesel engine**

**2.4-litre VVT petrol engine**

Increase fuel economy and sporty performance with the five-speed manual transmission. New output-reduction design enhances shift feeling and durability, with reduced vibration.

Automatic transmissions feature sporty shift-gate configurations, plus gear ratios tuned for satisfying acceleration, a smooth, quiet ride and effort-free operation.

# Expand your boundaries

Based on Suzuki's long tradition of developing reliable 4x4s, the Grand Vitara is a powerful and versatile vehicle that offers solid on- and off-road performance. There is no limit to where you can go in search of fun and adventure—except, perhaps, the limit on your own time!

## 4-mode 4x4

The Grand Vitara's 4-mode 4x4 system transmits power to all four wheels at all times, ensuring positive traction regardless of road surface. A switch built into the centre console lets you quickly and easily change modes between **4H** for most driving conditions, **4H Lock** for serious off-roading, **4L Lock** for extreme surface conditions, and **N (neutral)** mode, specifically intended for motor home owners wishing to take along an SUV on camping trips to use as a runabout. Switching to N-mode frees the transmission for safe and effortless towing of the Grand Vitara.

## 4H

The ideal mode for most driving, 4H mode offers the appropriate front/rear torque split for smooth, quiet on-road performance plus impressive off-road traction.

## 4H Lock

For serious off-roading, this high-range 4x4 mode evenly distributes traction to front and rear wheels for powering through even deep snow or mud.

Photo: 3-door JX model, Gaia Bronze Pearl Metallic (ZUG)

## Built-in Ladder Frame

The "Built-in Ladder Frame" which integrates a ladder frame to a monocoque body increases rigidity and durability without adding to overall weight. This lightweight, one-piece body also reduces overall and floor heights, increasing cabin space despite its high ground clearance. Adding in the fully independent suspension further enhances resistance to twisting and flexing while contributing to linear handling response for smoother on-road cruising and impressive off-road traction. The bottom line for driver and passengers alike is the freedom to go where you will and the stability to enjoy every minute of it.

The fully independent suspension features front MacPherson struts and rear multi-link geometry, complementing the "Built-in Ladder Frame" and decreasing body noise while increasing on-road response and off-road handling.

## 4L Lock

With a transfer gear ratio nearly twice that of 4H Lock mode at 1.970, this low-range 4x4 mode ensures enough low-end traction to get out of extremely difficult conditions.

# Go anywhere in style

With its bold new front mask and impressive fenders, the Grand Vitara presents an appearance that is both dynamic and stylish. Tough enough for off-road driving yet elegant enough to grace the city streets, this vehicle is in itself practically an adventure in panache and reliability.

# A driving delight

Not only does the Grand Vitara provide you with the power and reliability to get wherever you want to, but its overall quality ensures that you get there in style. The fully automatic air conditioning system enables you to set your preferred temperature while the state-of-the-art entertainment system enhances the enjoyment of your journey.

Photo: 5-door J1X model

Cruise control switches positioned on the front of the steering wheel spoke are easy to find and easier to use.

Fully automatic air conditioning system maintains the ideal cabin ambience for increased driving enjoyment.

## High-quality audio systems

Grand Vitara's cabin design is well matched to its sporty exterior styling. The refined atmosphere encourages driver and passengers to relax, while the smart, dynamic layout implies an active, fun-loving lifestyle. Available high-quality audio systems include single- and in-dash six-CD tuners. All factory-installed systems feature steering wheel-integrated controls for easy operation.

Availability of features shown may vary for individual markets and grades.

# Ride the rough in comfort

The cabin of the Grand Vitara offers enough “living space” to seat five in comfort. Moreover the seating arrangement is flexible and the positions can be arranged to suit the passengers and their gear. There are also enough compartments throughout the cabin for added convenience.

Photo: 5-door J LX model

Note: Please do not recline the front seatbacks too much when driving, as the seatbelts will not operate effectively in case of a collision or sudden stops.

## Noise and vibration reduction

Noise-reducing and vibration-absorbing materials have been extensively used throughout. These measures, together with the focused chassis and body engineering and the rigid “Built-in Ladder Frame,” enhance occupant comfort and increase all-round driving pleasure under a wide variety of driving conditions.

The centrally located floor console provides convenient storage for maps and other essentials, and features a sliding lid/armrest for comfort\*.

\*Sliding lid/armrest available for 5-door models only.

An available sunroof enhances cabin spaciousness, while allowing all occupants to better experience and appreciate the environment they're cruising through.

Availability of features shown may vary for individual markets and grades.

60:40-split rear seats\* can be separately reclined for individual passenger comfort, or tumbled forward for more space as lifestyle needs demand.

\*50:50-split rear seats for 3-door model.

# On the move—mind at rest

When you are confident in the safety of your vehicle, you can relax and enjoy your trip, wherever it takes you. The Grand Vitara, with its host of active and passive safety features, gives you peace of mind no matter how tough the terrain you travel.

## Electronic Stability Program

Available on select models, ESP®\* (Electronic Stability Program) supplements the Suzuki Grand Vitara's inherent stability with three major functions: ABS with EBD, traction control and stability control. ESP®'s ECU uses various sensors to determine and hold the intended cornering line, greatly increasing traction and stability control while reducing front and rear wheel-slip for enhanced safety.

\*ESP is a registered trademark of Daimler AG.

The front bumper under garnish uses SSPP (Suzuki Super Polypropylene), a new material that is lighter and provides better colour than conventional materials; unpainted for greater environmental consideration; and makes scratches less noticeable.

High levels of occupant protection comprise standard driver's and front passenger's SRS dual front airbags with seatbelt pretensioners and force limiters, plus SRS side and curtain airbags. Availability of features shown may vary for individual markets and grades. Note: The SRS airbags are shown inflated for descriptive purposes.

Rear-seat occupants of 5-door models have three 3-point ELR seatbelts.

# A new destiny

No matter how far you travel, no matter how tough the terrain or how bad the weather, your journey will be fun in the Grand Vitara. It will get you to your destination safely, and in comfort. Open up your horizons and take the Grand Vitara to places you've never been before! New discoveries await you.
